

Prep™

COVERS UP TO 5,000 SQ. FT.

Prep™ is a uniquely formulated product for use prior to turfgrass establishment to loosen the soil crust, allowing for expedited rooting. Additionally, Prep™ increases air and water movement through the soil profile, reduces compaction, increases micropore space, and allows for nutrient penetration into the soil.

Directions For Use: Apply the contents of this package to coverage area of up to 5,000 sq. ft. prior to the installation of sod or seed. For best results, follow this application with the spreading of an organic soil material containing humus, and a starter fertilizer containing phosphorus and potassium.
