AgChimp Tomato, Pepper, and Eggplant Plant Food is specifically formulated to provide balanced nutrition to the "Nightshade" (Solanaceae) family of plants which includes tomatoes, peppers, eggplant, and potatoes. The Nightshade family, especially tomatoes are very susceptible to blossom end rot. Blossom end rot is a result of a calcium deficiency in the soil. AgChimp Tomato, Pepper and Eggplant Plant Food contains slow release nitrogen, increased phosphorus concentrations and higher potassium concentrations which helps to guard against the fruit splitting. Directions for Use: Using the scoop provided, place 1-2 scoops (1.5 - 3.0 oz) of this product evenly around the base of each plant extending 12-18" out from the main trunk. Reapply every 14-28 days during the growing season. For best results, water each plant after application. Reseal product package and store in a cool, dry area. Do not apply if heavy rain is expected. This product may stain concrete, stone and other materials.
