

# Zoysiagrass

Zoysiagrass (Zoysia) is a warm-season grass that spreads by rhizomes and stolons to produce a very dense, wear-resistant turf. Zoysiagrass can often be confused with bermudagrass. However, zoysiagrass has hairs standing upright on the leaf blade whereas bermudagrass does not. Zoysiagrass is also stiff to the touch and offers more resistance than bermudagrass.
